# Luci Core

Instruction manual

MPOWERD®

Getting to know Luci

1. Power button
2. Solar panel
3. Built-in USB port
4. Adjustable arm
5. Matte top plate
6. Hook clip

How to use

Shine

• Press power button to turn unit on.

• 1 click for low mode, 2 clicks for medium, 3 clicks for high, 4 clicks for flashing, 5 clicks to turn off, or hold for 2 seconds at any time to turn off.

Adjusting the arm

• To adjust the arm, simply twist and bend the arm to any position needed, and the strength of the arm will hold in place.

• Arm can be twisted and formed into any shapes, as many times as necessary without affecting the material.

• Use the "hook clip" at the end of the arm to lock a loop in place or balance the light when upright.
Charging

Charge via solar

• With solar panel side up, place in direct sunlight for up to 13 hours for a full charge.

Charge via USB

• Insert the USB cord provided into the USB port on the side of product, and then insert the other end into a USB outlet for 1 hour.

• Ensure the cord is firmly in position when connected.

USB Port

A. Lift cap to reveal port

B. USB port for charging the light

Frequently asked questions

What is direct sunlight?

Direct sunlight means that the sun's light is directly hitting the solar panel. For example, if you were standing outside under the sun with nothing obstructing you and the sun, then you would be in direct sunlight. If you were standing inside, you would be getting indirect sunlight but no direct rays from the sun. Solar panels always need direct sunlight to charge. If in doubt, think of it this way; if you were Luci and you were able to directly see the sun, then you would be in direct sunlight!

It's cloudy, will my light still charge?

Yes, but it will charge at a slower rate than on a bright, clear day. As your Luci charges via the red and violet frequencies of visible light, the charge times will vary based on the UV index or overcast skies. Generally speaking, the higher the UV index, the faster the charge.

Will my light charge under indoor lighting?

The sun generates significant red and violet frequencies (which charge your Luci), whereas your ordinary indoor lights emit a tiny fraction of that UV. We recommend you go straight to the source and put your Luci directly in the sunlight from a windowsill or, for the best results, outside! Luci is durable and completely waterproof.

What's the difference between charging the light via USB or the solar panel?

Speed! Charging via USB is ~6x faster than via solar due to the input power. Whether charging via solar or USB however, the outcome remains the same - a full battery charge. Our advice is to charge via solar for a natural source of power, but if you're in a pinch, charge via USB.

Can I charge your products from my car dashboard?

We advise against charging on a car dashboard. On a hot summer day, your car dashboard can reach temperatures of up to 160°F (71°C) which exceeds the temperature limit of our products - 122°F (50°C).

Can I charge devices with Luci Core?

Luci Core only charges in, and not out. Meaning that you can charge the light via USB, but you can't charge devices from it.

Can my light be left outside?

Yes! In fact, our products love being outside in the open. Luci is durable and completely waterproof. This means you don't need to go running to bring them in when it rains. Luci: 1, laundry: 0.

What is the white hook at the end of the arm for?

This hook is for securing your light once you have adjusted and positioned the arm in place. If you wrap the arm around a pole, for example, you can slot the arm into the hook, and this will fix the light in that position. *Pro tip: It can also act as a nifty little tool to balance the light when set up like a traditional lamp.*

What's the best way to hang the light?

Core can be hung in so many ways, we've lost count! The easiest way to hang Core is to wrap it around a pole (or similar), affix it using the hook clip, and then tilt your light in the direction you need. But it's completely your choice; you can hang your light however you see fit.
